CONTENTS OF VOLUME 3

SPECIAL INVITED PAPERS

BRILLINGER, DAVID R. The identification of point process systems. Discussion by D. R. Cox, P. Z. Marmarelis, and J. P. Segundo 909–929

SPITZER, FRANK. Markov random fields on an infinite tree 387–398

ARTICLES AND SHORT COMMUNICATIONS

AFGHAHI, M. H. On the rate of convergence in the central limit theorem in two dimensions and its application 802–814

ARTSTEIN, ZVI AND VITALE, RICHARD A. A strong law of large numbers for random compact sets 879–882

BAR-DAVID, ISRAEL AND EIN-GAL, MOSHE. Passages and maxima for a particular Gaussian process 549–556

BARLOW, WILLIAM J. Coefficient properties of random variable sequences 840–848

BENEDICKS, MICHAEL. An estimate of the modulus of the characteristic function of a lattice distribution with application to remainder term estimates in local limit theorems 162–165

BHATTACHARYA, R. N. On errors of normal approximation 815–828

BIONDINI, RONALD W. AND SIDDIQUI, M. M. The joint distribution of record values and inter-record times 1012–1013

BLACKWELL, DAVID AND DUBINS, LESTER E. On existence and non-existence of proper, regular, conditional distributions 741–752

BLUM, JULIUS AND EISENBERG, BENNETT. The law of large numbers for subsequences of a stationary process 281–288

BOOK, STEPHEN A. Convergence rates for a class of large deviation probabilities 516–525

BRUNK, H. D. Uniform inequalities for conditional p-means given σ-lattices 1025–1030

CAMBANIS, STAMATIS. On the path absolute continuity of second order processes 1050–1054

CHEN, LOUIS H. Y. An approximation theorem for convolutions of probability measures 992–999

CHEN, LOUIS H. Y. Poisson approximation for dependent trials 534–545

ÇINLAR, ERHAN. A local time for a storage process 930–950

COGBURN, ROBERT. A uniform theory for sums of Markov chain transition probabilities 191–214

CSISZÁR, I. I-divergence geometry of probability distributions and minimization problems 146–158

CUZICK, JACK. Conditions for finite moments of the number of zero crossings for Gaussian processes 849–858

DARLING, D. A. Note on a limit theorem 876–878

DE ACOSTA, ALEJANDRO. Stable measures and seminorms 865–875

DE MARÉ, JACQUES, ROOTZÉN, HOLGER AND LINDGREN, GEORG. Weak convergence of high level crossings and maxima for one or more Gaussian processes 961–978

DENZEL, G. E. AND O'BRIEN, G. L. Limit theorems for extreme values of chain-dependent processes 773–779
DEO, CHANDRAKANT M. A functional central limit theorem for stationary random fields 708–715
DHARMADHIKARI, S. W. AND SREEHARI, M. On convergence in r-mean of normalized partial sums 1023–1024
DUBINS, LESTER E. Finitely additive conditional probabilities, conglomerability and disintegrations 89–99
DUBINS, LESTER E. AND BLACKWELL, DAVID. On existence and nonexistence of proper, regular, conditional distributions 741–752
DUBINS, LESTER E. AND SUDDERTH, WILLIAM D. An example in which stationary strategies are not adequate 722–725
EAGLESON, G. K. Martingale convergence to mixtures of infinitely divisible laws 557–562
EIN-GAL, MOSHE AND BAR-DAVID, ISRAEL. Passages and maxima for a particular Gaussian process 549–556
EISENBERG, BENNETT AND BLUM, JULIUS. The law of large numbers for subsequences of a stationary process 281–288
ERICKSON, R. V. AND FABIAN, VÁCLAV. On vague convergence of stochastic processes 1014–1022
ESTY, WARREN W. Critical age-dependent branching processes 49–60
FABIAN, VÁCLAV AND ERICKSON, R. V. On vague convergence of stochastic processes 1014–1022
FISHBURN, PETER C. Weak comparative probability on infinite sets 889–893
FLATTO, LEOPOLD AND PITT, JOEL. Recurrent random walks on countable Abelian groups of rank 2 380–386
FREEDMAN, DAVID A. On tail probabilities for martingales 100–118
GÁCS, P. AND SZÁSZ, D. On a problem of Cox concerning point processes in R^k of "controlled variability" 597–607
GANI, J. AND SHANBHAG, D. N. A new decomposition of infinitely divisible distributions 338–345
GERGELY, T. AND YEZHOW, I. I. On the distribution of the maximum of the sequence of sums of independent random variables 289–298
GINÉ, EVARIST AND KLEIN, RUBEN. On quadratic variation of processes with Gaussian increments 716–721
GLESER, LEON JAY. On the distribution of the number of successes in independent trials 182–188
GRAY, ROBERT M., NEUHOFF, DAVID L. AND ORNSTEIN, DONALD S. Nonblock source coding with a fidelity criterion 478–491
GRAY, ROBERT M., NEUHOFF, DAVID L. AND SHIELDS, PAUL C. A generalization of Ornstein's $\bar{d}$ distance with applications to information theory 315–328
GREENWOOD, PRISCILLA. Extreme time of stochastic processes with stationary independent increments 664–676
GRUNKEMEIER, GARY L. Decomposition of functions of bounded variation 329–337

HALFIN, S. Explicit construction of invariant measures for a class of continuous state Markov processes 859–864
HEYDE, C. C. A nonuniform bound on convergence to normality 903–907
HOLLEY, RICHARD A. AND LIGGETT, THOMAS M. Ergodic theorems for weakly interacting infinite systems and the voter model 643–663
HUDSON, W. N. AND MASON, J. D. More on equivalence of infinitely divisible distributions 563–568
HUDSON, WILLIAM N. AND TUCKER, HOWARD G. Equivalence of infinitely divisible distributions 70–79
HUNTINGTON, RAYMOND J. AND NAUS, JOSEPH I. A simpler expression for Kth nearest neighbor coincidence probabilities 894–896
IVKOVIĆ, Z. Deduction of Wold representation of stationary processes from Cramér representation of second-order processes 546–548
JAIN, NARESH C., JOGDEO, KUMAR AND STOUT, WILLIAM F. Upper and lower functions for martingales and mixing processes 119–145
JAIN, NARESH C. AND PRUITT, WILLIAM E. The other law of the iterated logarithm 1046–1049
JAMES, BARRY R. A functional law of the iterated logarithm for weighted empirical distributions 762–772
JOGDEO, KUMAR, STOUT, WILLIAM F. AND JAIN, NARESH C. Upper and lower functions for martingales and mixing processes 119–145
JOSHI, V. M. A new bound for standard p-functions 346–352
JUREČKOVÁ, JANA AND PURI, MADAN L. Order of normal approximation for rank test statistics distribution 526–533
KAIGH, W. D. A conditional local limit theorem for recurrent random walk 883–888
KAIJSER, THOMAS. A limit theorem for partially observed Markov chains 677–696
KAILATH, THOMAS AND SEGALL, ADRIAN. Radon-Nikodym derivatives with respect to measures induced by discontinuous independent-increment processes 449–464
KALLENBERG, OLAV. On the existence and path properties of stochastic integrals 262–280
KANTER, MAREK. Some martingales associated with sample spacings ... 569–572
KANTER, MAREK. Stable densities under change of scale and total variation inequalities 697–707
KAPLAN, NORMAN. Limit theorems for a $GI/G/\infty$ queue 780–789
KESTEN, HARRY AND SPITZER, FRANK. Controlled Markov chains 32–40
KIEFFER, J. C. A generalized Shannon-McMillan theorem for the action of an amenable group on a probability space 1031–1037
KINGMAN, J. F. C. The first birth problem for an age-dependent branching process 790–801
KIU, SUN-WAH. Two dimensional semi-stable Markov processes 440–448
KLEIN, RUBEN AND GINÉ, EVARIST. On quadratic variation of processes with Gaussian increments 716–721
KNIGHT, FRANK B. A predictive view of continuous time processes 573–596
